

ICRI Plan of Action 2018-2020

Theme 2: Understand the trends of coral reefs

Action 2A – Establish a functioning, globally coordinated and sustainably funded GCRMN

- Develop an Implementation and Governance Plan
- Develop a business plan to support enduring funding for core activities of the GCRMN

ICRI Plan of Action 2018-2020

Theme 2: Understand the trends of coral reefs

Action 2B - Ensure monitoring data is fit-for-purpose to aid better decision-making and management

- Ensure that the indicators, data collection, analysis and communication methods meet management reporting and policy requirements at national, regional and global levels
- Establish specific Task Forces to provide technical advice on data collection, type, quality, sharing and management, reporting and communication to enhance utility and adoption in management and policy development

ICRI Plan of Action 2018-2020

Theme 2: Understand the trends of coral reefs

Action 2C - Build capability to collect, analyse, manage and report ecological, social, economic and cultural data associated with coral reefs

- Strengthen capability to monitor the condition of ecological, social, economic and cultural dimensions associated with coral reefs through direct engagement and training of network members;
- Introduce members to standardised data collection protocols to assist with data collection and subsequent integration across monitoring programs and regions; and
- Develop protocols and infrastructure to support data analysis, management and integration.

ICRI Plan of Action 2018-2020

Theme 2: Understand the trends of coral reefs

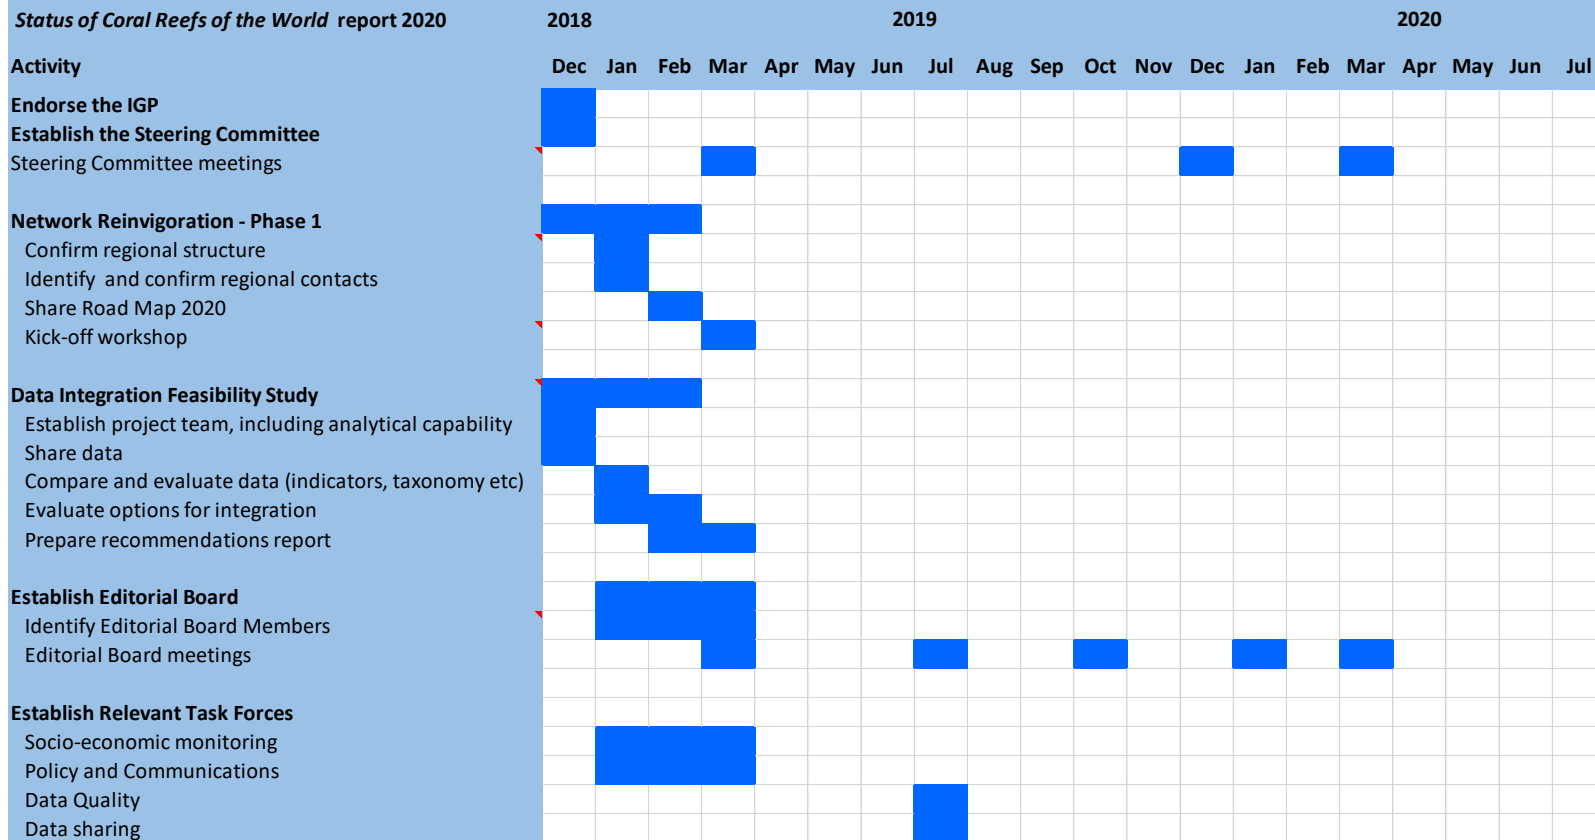

Action 2D - Produce a *Status of Coral Reefs of the World* report by mid-2020

- Develop and implement a plan for the delivery of a *Status of Coral Reefs of the World* report by mid-2020;
- Mobilize the global coral reef monitoring community to contribute relevant information and data to a 2020 report, including social, economic and cultural information;
- Produce a series of regional status reports in support of the 2020 global *Status Report*;
- Develop a communication strategy to ensure that the 2020 *Status Report* has greatest impact at national, regional and international scales; and
- Conduct a session on the status of the world's coral reefs at the next ICRC in Bremen in 2020.

Status of Coral Reefs of the World report 2020

GCRMN *Status of Coral Reef of the World 2020*

Status of Coral Reefs of the World report 2020

Activity

Regional Report Production

Communication of Road Map to regional contributors
Data Collation/Collection
Data analysis
Drafting regional reports
Review regional reports
Presentation of regional reports to ICRI GM
Collation of comments
Technical edit and layout
Print Reports

Global Report Production and Communication

Integration of data from Regional Reports
Synthesis of information from Regional reports
Review of Draft Global Report
Potential contribution to CBD SBSTTA
Presentation of preliminary Global Report to ICRI GM
Address comments and Finalise Global Report
Technical edit and layout
Print Report
Shipping of report
Launch - UN Ocean Conference, IUCN Congress
ICRS Bremen
