## MANAGEMENT

## ASSESSMENT OF THE MANAGEMENT

### Importance of analysis by an external structure

After 5 years

Analysis of the achievement of objectives

Evaluation of the implementation of the plan

Improvement of knowledge

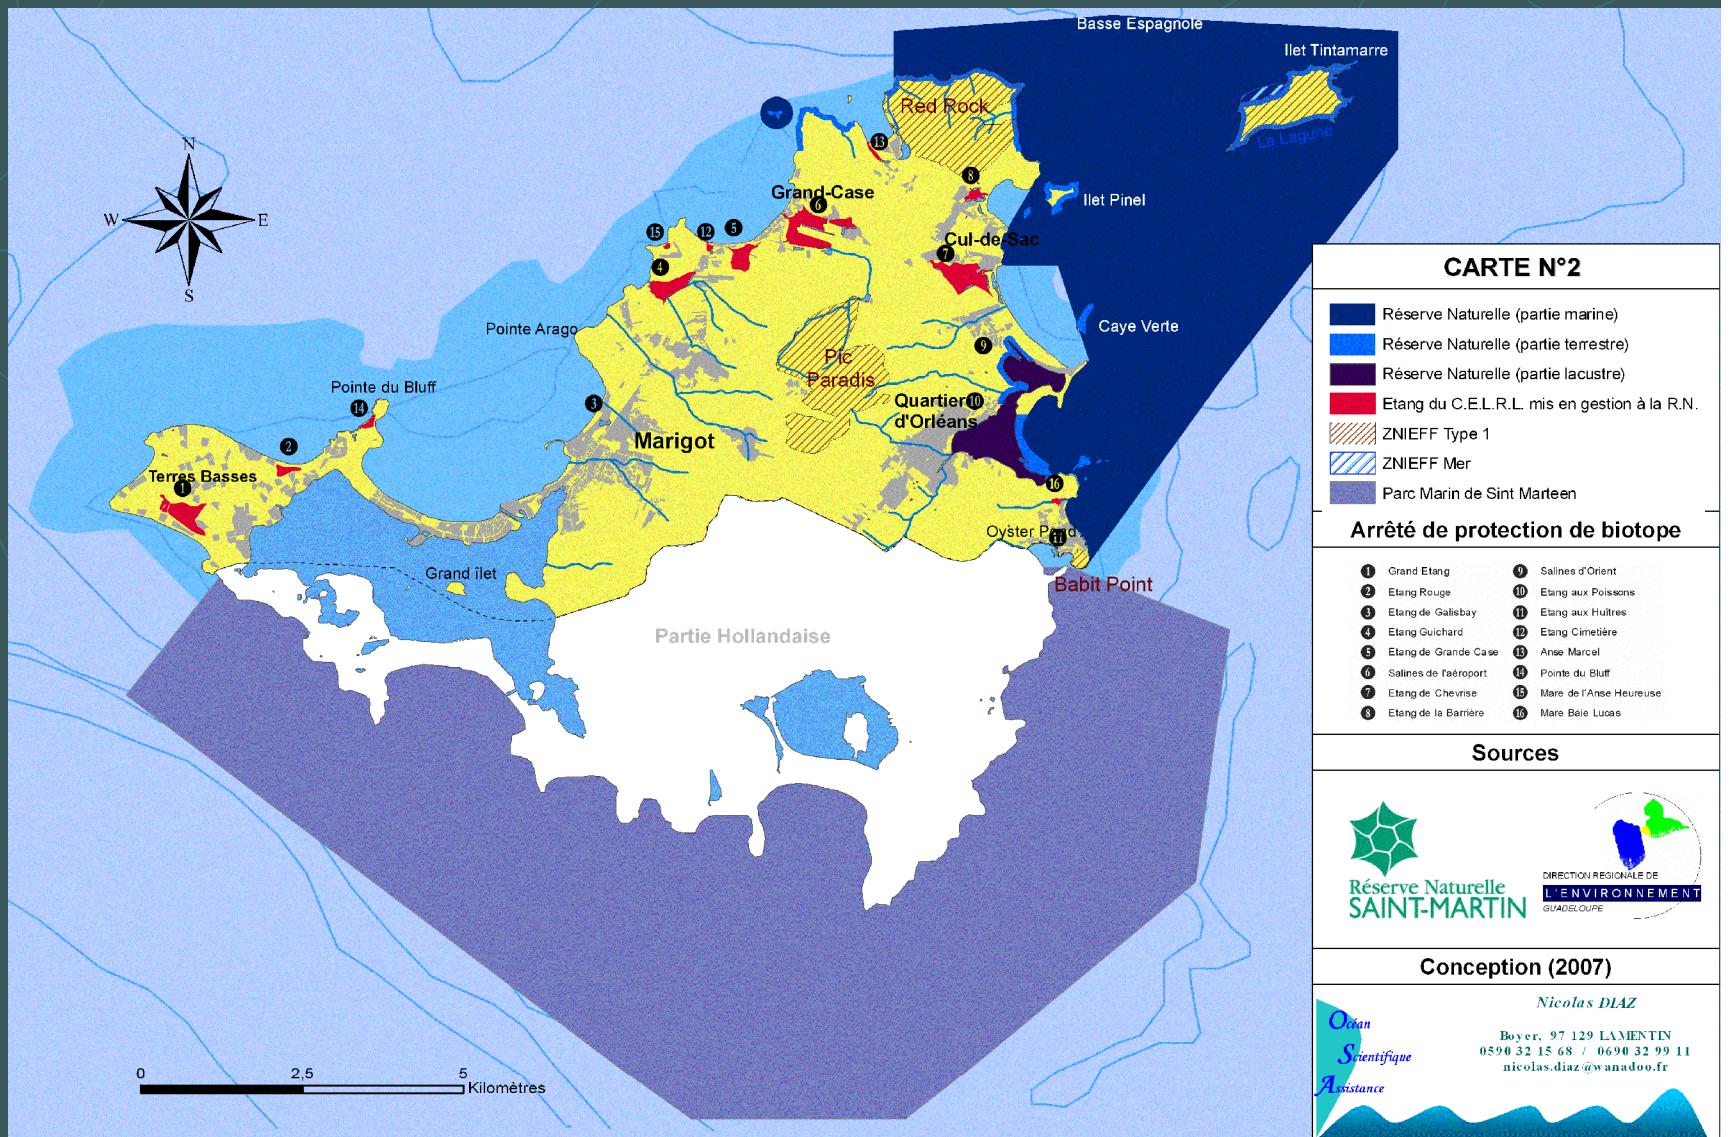

Analysis of the monitoring's results

Efficiency and relevance of the actions and objectives

Assesment of financial, material and human tools

# A total surface of 3054 ha

# Main Issues :

## Conservation issues :

- Sensitive/threatened habitats
- Sensitive/internationally protected species
- Anthropic impact on species & habitats

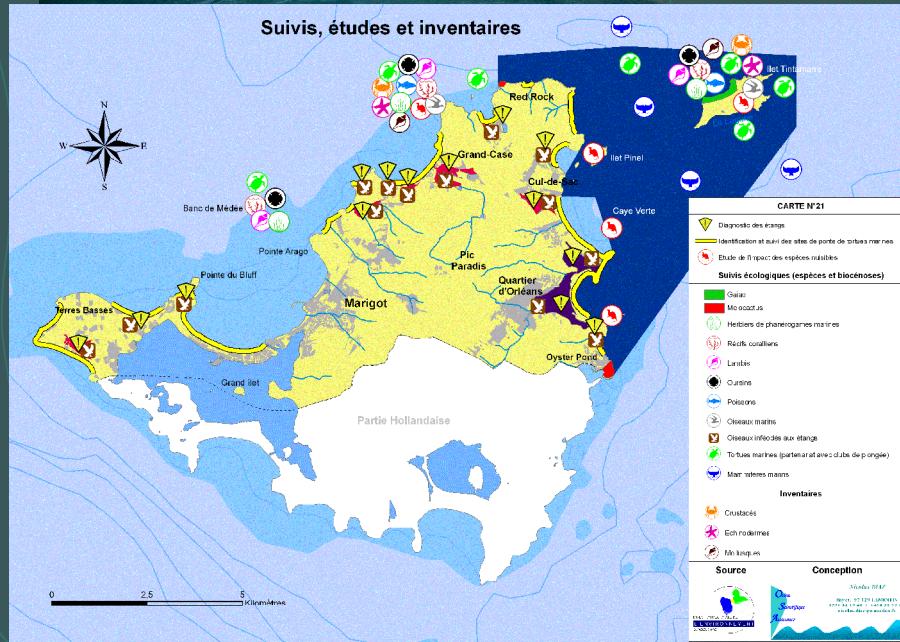

## Issue of knowledge :

- Wetlands
- Inventory & monitoring of habitats & species

## Cultural & educative issues :

- Environmental education, awareness
- Links population-RNN, RNN : economic development tools

# To improve scientific knowledge of habitat & species

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

# To control anthropic pressure on protected areas

Franck MAZEAS aout 2007

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

Ministère de l'Ecologie, de l'Aménagement  
et du Développement Durable

## ENTREPRISE IDENTITE

### Nom de l'entreprise

Adresse de l'entreprise :

Téléphone :

Télécopie :

E-mail :

Téléphone cellulaire :

Activité de l'entreprise :

Date de début d'exploitation :

Numéro RCS :

Numéro Siret :

Code APE :

### Nom, prénom employés et qualité

### Moyens de navigations terrestres et maritimes

Nombre de navire :

Type de navire :

### Activités proposées

Type :

Tarifs des activités :

### Nombre par activités Maxi et Mini

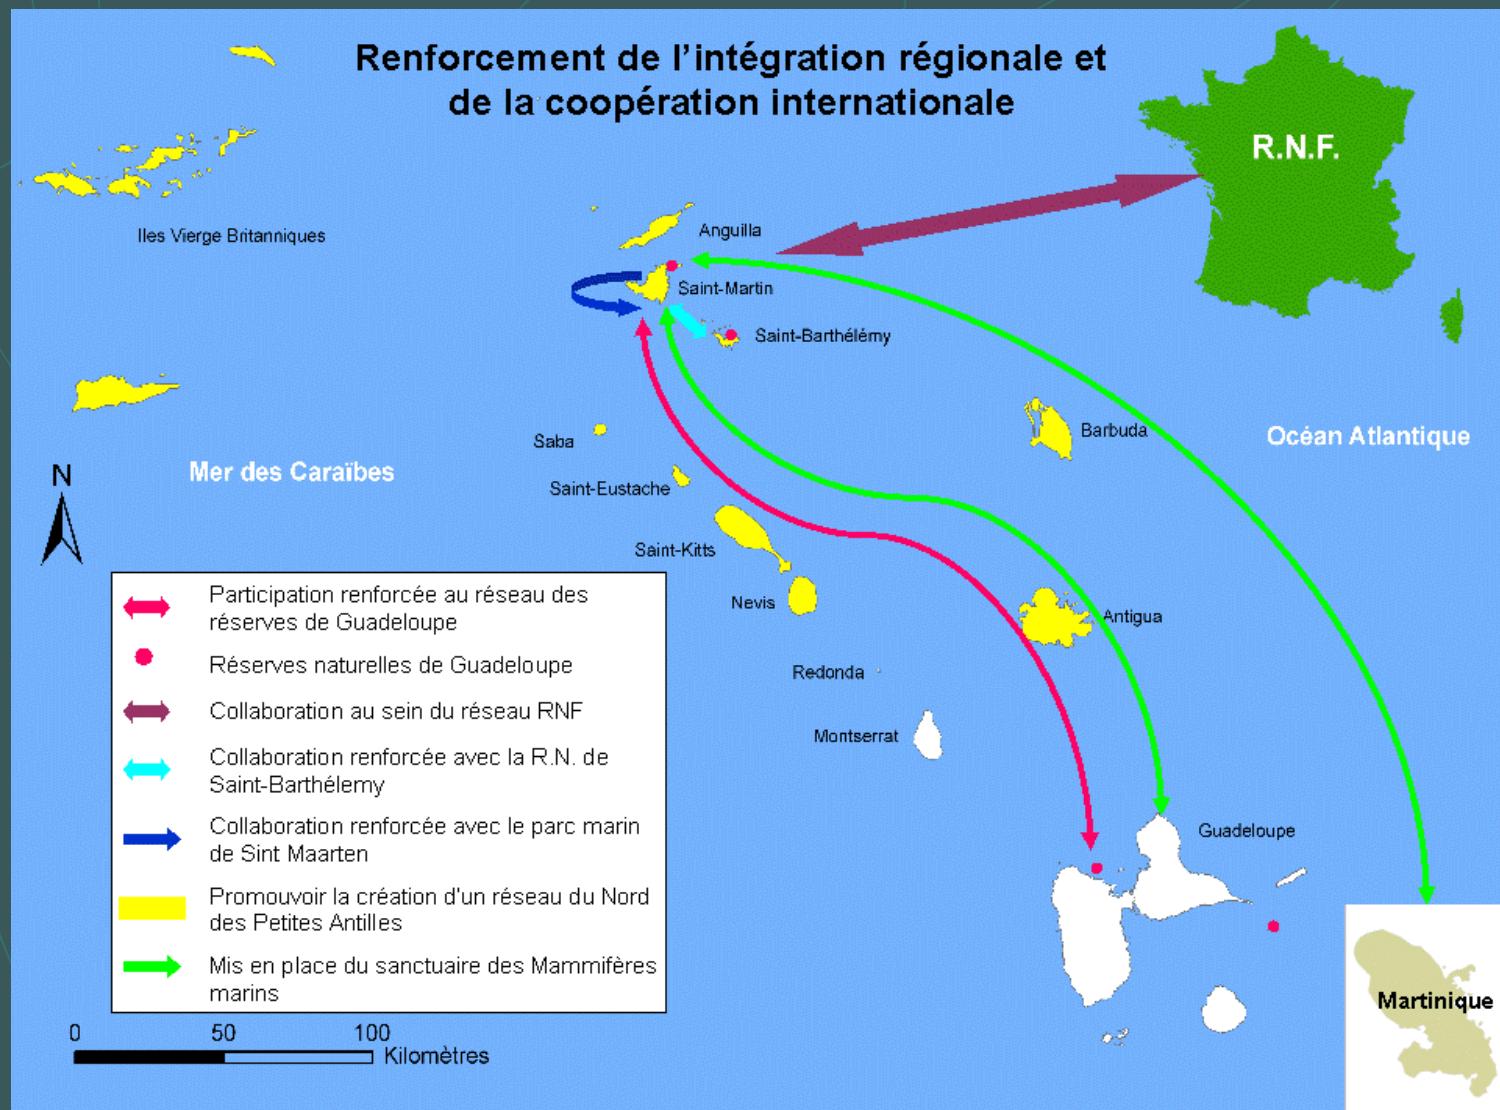

# To restore damaged habitats & populations

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

# To reinforce international & regional cooperation

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

# Assessment of the management efficiency

- Assessment of the management efficiency by the analysis of MPA effect : project PAMPA  
Definition and test of these indicators to assess the MPA's performance, in link with the management objectives in order to adapt them.
- Natural reserve of Saint-Martin = pilot for FWI.

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

# SOCIO-ECONOMIC ASSESSMENT OF THE NATURAL RESERVE OF SAINT-MARTIN

- Goals :

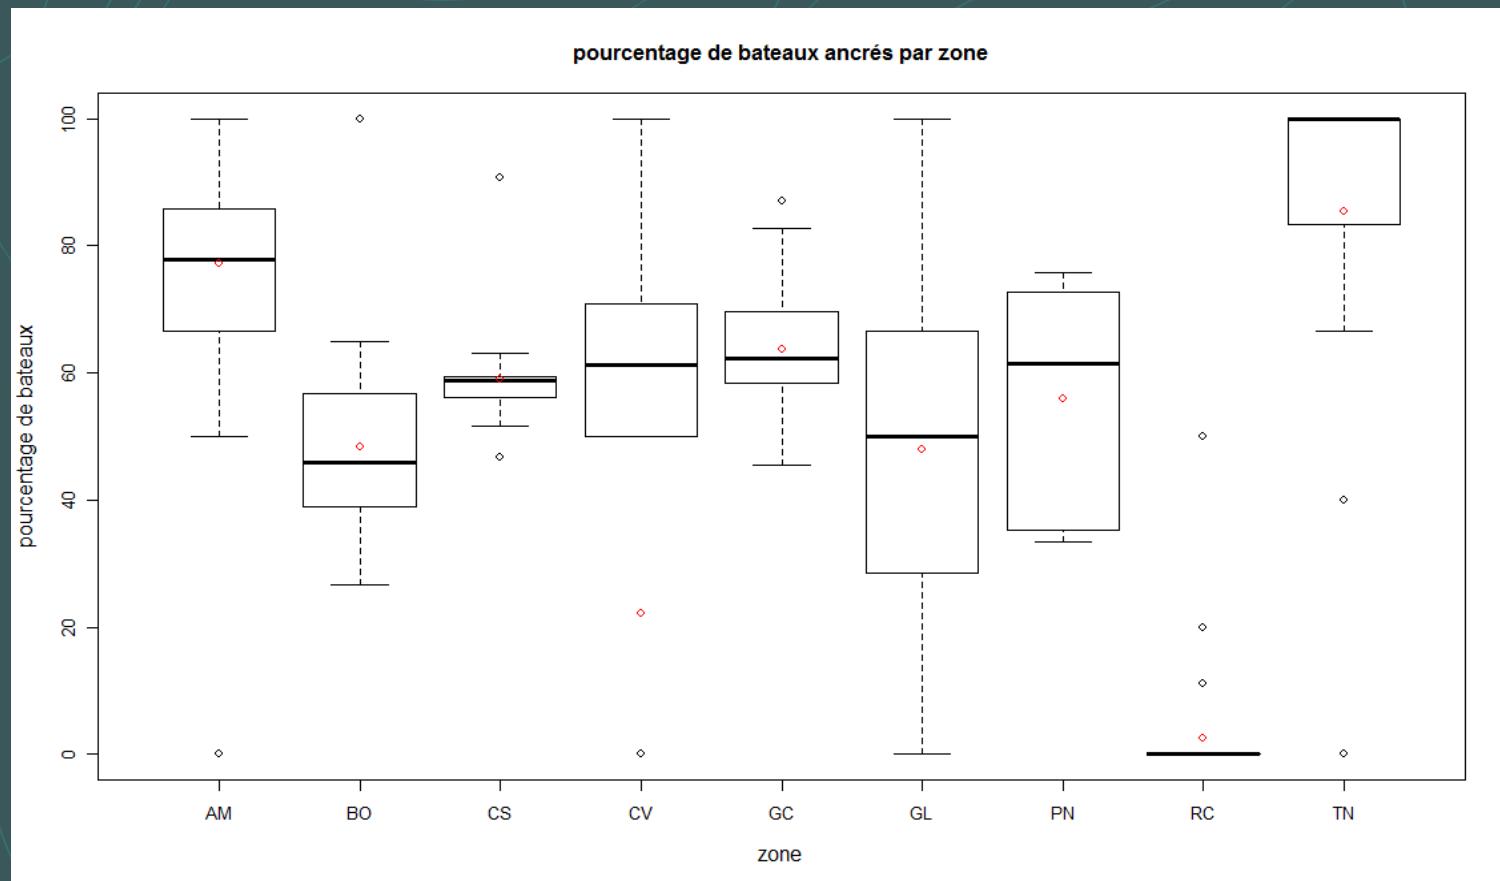

- To know spatial and temporal distribution of frequentation and its evolution.
- To know profiles, perceptions and expectations of users.
- To know the success of the natural space and its attractivity.
- Measure pressures on areas, species and habitats.

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010

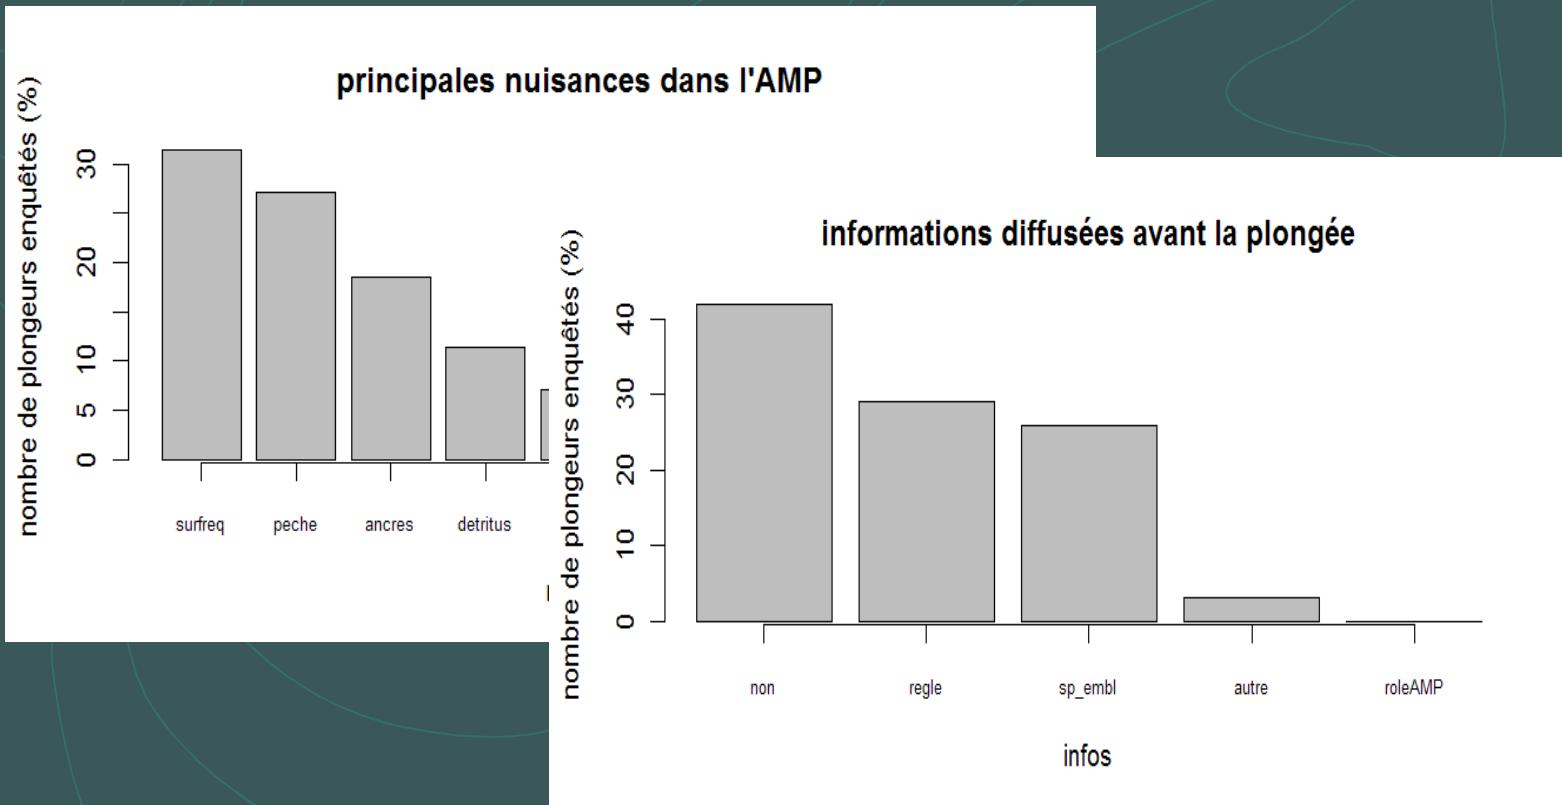

# RESULTS

- Pressure indicators

# RESULTS

- Opinion indicators

# RESULTS

- Descriptive indicators
  - Number of boats by season / areas
  - Number of boats by weather condition / areas
  - Kinds of boats / areas
- Socio-economic indicators
  - Proportion residents / non-residents
  - Local expenses
  - Whishes to come back
- Practice indicators
  - Proportion of the activity in the MPA
  - Influence of the MPA/activity in the choice of the site
  - Number of years of frequentation

# THANKS FOR YOUR ATTENTION

Pauline MALTERRE – RNN Saint-Martin – ICRI, Monaco 2010
